# SPACE

Just as little kids full of imagination, we gazed at the ethereal sky and sought to interpret what we see using colors. And we designed little planets that you can call your own.

Each planet is one of a kind and that makes each candle holder have unique lighting too. Handmade with passion, lit with sky.

# SIERRA

What do you do when the mountains call you? Just like John Muir did, you go. Maybe it's time for you to lose your mind but find your soul, and somewhere between the foothill and the peak is the hidden answer to the mystery why you started climbing in the first place. You never know. No second-guessing when you hear that humble but ethereal voice.

This romantically powerful sight will remind you that it's not the mountain you conquer but yourself. And that everything exists with its opposite. Male and female, night and day, yin and yang, ashes and ice... It might get dark but it's only to let the sun rise again.

Welcome Sierra in your space and let it change your scenery.

# COMET

Hold your breath, make a wish, count to three. Just like it's told through the magical lyrics of the idyllic song sung by Willy Wonka, everything is possible in the world of pure imagination.

Comet will take you to that world. With the inspiration of a beautiful indigo sky full of stars, we created Comet to be a sweet travelling companion into your dreams. And you don't even have to wait for a shooting star to make a wish.
